

Landscape Construction Crew Leader

We're different. As southeastern Wisconsin's sustainable landscape leader and only company offering a 100%-organic lawn care program, we're passionate about our mission – providing innovative landscape services that reduce energy, chemical and water-use footprints. We're equally passionate about providing our employees a healthy and safe work environment with significantly reduced exposure to chemicals, which is why we equip every crew with natural alternatives to conventional pesticides.

We're socially involved, partnering with non-profit and education-based organizations on projects that improve our communities and the environment. And we invest in our employee family, hosting monthly gatherings that foster our unique team culture – canoeing, rock climbing, boating and Milwaukee-area tours, to name a few.

Flexible full- and part-time schedules, including evenings and weekends, are available for qualified candidates – we have families and hobbies, too! And if you like to work a 50- to 60-hour week, that's an option. Our benefits package includes a Simple IRA plan with employer match, free chiropractic care, healthy activity stipend, paid holidays and a health insurance stipend for employees with qualifying plans.

If you're committed to the environment and in search of a healthier approach to creating and maintaining landscapes, you may be a great fit for our team!

RESPONSIBILITIES

- Inspect and prepare equipment and materials for the day
- Operate equipment and trucks in a safe manner
- Read and interpret blueprints, plans and specifications
